

Energy Policy Statement

Introduction

ROCKWOOL Limited is the UK subsidiary of the ROCKWOOL Group, the world's leading producer of stone mineral wool insulation products that provide thermal insulation, fire protection and acoustic performance. Our products are made from natural, recyclable stone making them durable and sustainable.

ROCKWOOL Limited aims to produce stone wool insulation in a safe and efficient manner that meets customers' requirements and conforms to relevant standards and legislation while upholding company values.

Procedures

The Management Team is committed to promoting efficient use of energy and achieves this by:

- Operating an energy management system that is certified to ISO 50001:2018.
- Complying with all applicable legislation and other requirements.
- Targeting energy saving potential and implementing cost effective energy saving measures.
- Ensuring energy efficiency is a factor that is taken into consideration when procuring equipment, products and services.
- Monitoring energy use and driving continual improvement by setting targets on an annual basis.
- Ensuring the availability of sufficient information and resources to meet those targets.
- Improving practices to support the ROCKWOOL Group in meeting its long-term Sustainability Goals.
- This policy forms the basis of the Energy management system on which objectives and targets are set and reviewed annually at the Management Review.
- Communicating this Policy to every worker and making it available to interested parties on request.

Responsibilities/Organisation

- Directors and Senior Managers have prime responsibilities to ensure that energy matters are considered and properly managed within their respective business areas.
- Managers are responsible for ensuring business processes and systems are fully applied in order to improve energy efficiency, reduce energy use and monitor energy consumption.
- Environmental Manager is responsible for producing and maintaining documentation which supports operations to achieve energy targets. Environmental Manager is also responsible for monitoring and reporting on compliance.
- Workers must follow procedures and use the equipment provided correctly in the interests of energy efficiency. Workers must also bring to the attention of management any matters which may affect energy consumption.
